DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 21 rejected under 35 U.S.C. 102(e) as being anticipated by Peterson et al (US6299579) which teaches in col. 7 line 56 – col. 8 line 12 that during the compounding of first and further elemental image frames to produce a compound image due to the transducer motion 14, the compounded image which is displayed may comprise only a subset of data 72 of the new elemental image 82 is combined with the edge or peripheral overlap of the previous elemental image frame.

Allowable Subject Matter

Claims 1 – 20 are allowed.

Hossack et al (US6364835) which matured from Attorney Docket 5050/710 is cited as of interest, both the applications ('710 and '711) cited in the NPL submission having been considered for their pertinence.
